

WORLD PATIENT SAFETY DAY

To mark the annual **WORLD PATIENT SAFETY DAY**, three organisations – **COHSASA** of South Africa, **AfiHQSA** of Ghana and **C-CARE** (IHK) of Uganda – are collaborating to bring you the latest thinking across Africa regarding medication without harm – the theme for this year's World Health Organization (WHO) third global patient safety challenge.

This challenge aims to reduce the global burden of iatrogenic medication-related harm by 50% within five years.

Join us to hear new ideas, visions and solutions to address medication-related adverse events which cause untold death and suffering around the world.

DATE:

16th September 2022

12:00 GMT | 14:00 SAST | 15:00 EAT
