Dear Aidan,

Thank you for your email on 18 August 2022 and the accompanying response to the detailed questions regarding the design, development, and implementation of the LFPSE service raised our briefing note sent to you on 27 July 2022.

Patient Safety Learning has been continuing to support the specialists working in patient safety, incident reporting experts, governance and risk leads who have been raising these issues. There has been a further meeting following your response on the 18 August of the Patient Safety Management Network on 2 September 2022, to discuss this. This was attended by over 140 people, with representatives from Acute, Mental Health, Community, Primary Care and ICS organisations. They all agreed that it would be helpful to share these discussions with you and your colleagues at NHSE colleagues and the LFPSE team.

Please see my letter attached highlighting these discussions.

Best wishes

Helen
